literature and weather shakespeare goethe zola is dedicated to the relation between literature and weather i.e. a cultural practice and an everyday phenomenon that has played very different epistemic roles in the history of the world the study undertakes an archaeology of literature's affinity to the weather which tells the story of literature's weathery self reflection and its creative reinventions as a medium in different epistemic and social circumstances the book undertakes extensive close readings of three exemplary literary texts shakespeare's the tempest goethe's the sufferings of young werther and zola's the rougon macquarts these readings provide the basis for reconstructing three distinct formations negotiating the relationship between literature and weather in the 17th the 18th and the 19th centuries the study is a pioneering contribution to the recent debates of literature's indebtedness to the environment it initiates a rewriting of literary history that is weather sensitive the question of literature's agency its power to affect cannot be raised without understanding the way the weather works in a certain cultural formation

myth in the modern novel imagining the absolute posits a twofold thesis first although modernity is regarded as an era dominated by science and rational thought it has in fact not relinquished the hold of myth a more primitive form of thought which is difficult to reconcile with modern rationality second some of the most important statements as to the reconcilability of myth and modernity are found in the work of certain prominent novelists this book offers a close examination of the work of eleven writers from the late eighteenth century to the

beginning of the twenty first representing german french american czech and swedish literature the analyses of individual novels reveal a variety of intriguing views of myth in modernity and offer an insight into the modernizing transformations myth has undergone when applied in the modern novel the study shows the presence of the subconscious the mythic layer in modern western culture and how this has been dealt with in novelistic literature

silence is not simply the absence of noise it is within us in the inner citadel that great writers thinkers scholars and people of faith have cultivated over the centuries it characterizes our most intimate and sacred spaces from private bedrooms to grand cathedrals those vast reservoirs of silence philosophers and novelists have long sought solitude and inspiration in mountains and forests yet despite the centrality of silence to some of our most intense experiences the transformations of the twentieth century have gradually diminished its value today raucous urban spaces and a continual bombardment from different media pressure us into constant activity we are losing a sense of our inner selves a process that is changing the very nature of the individual this book rediscovers the wonder of silence and with this a richer experience of life with his predilection for the elusive corbin calls us to listen to

filmmakers have drawn inspiration from the pages of emile zola from the earliest days of cinema the ever growing number of adaptations they have produced spans eras genres languages and styles in spite of the diversity of these approaches numerous critics regard them as inferior copies of a superior textual original but key novels by zola resist this critical approach to adaptation both at the level of characterization and in terms of their own textual inheritance they question the very possibility of origin be it personal or textual in the light of this questioning the cinematic versions created from zola s texts merit critical re evaluation far from being facile copies of the nineteenth century novelist s works these films assess their own status as adaptations playing with both notions of artistic creation and their own artistic act
