Application Acceleration and WAN Optimization Fundamentals

2012-01-10

It organizations face pressure to increase productivity improve application performance support global collaboration improve data protection and minimize costs in today's WAN centered environments traditional LAN oriented infrastructure approaches are insufficient to meet these goals Application Acceleration and WAN Optimization Fundamentals introduces a better solution integrating today's new generation of accelerator solutions to efficiently and effectively scale networks beyond traditional capabilities while improving performance and minimizing costs through consolidation Ted Grevers and Joel Christner begin by reviewing the challenges network professionals face in delivering applications to globally distributed workforces you learn how accelerators are transforming application business models enabling IT departments to centralize and consolidate resources while also delivering consistently superior performance Grevers and Christner show how to identify network consumers prioritize traffic and guarantee appropriate throughput and response times to business critical applications you learn how to use quality of service techniques such as packet classification and marking and traffic policing queuing scheduling and shaping next you compare options for integrating accelerators and optimization services into your network and for optimizing content delivery the authors show how to address application protocol related performance problems that cannot be resolved through compression or flow optimization alone in the final chapter the authors walk you through several real world scenarios for utilizing accelerator technology Ted Grevers Jr is the solution manager for the Cisco Video IPTV Systems Test and Architecture C Vista team he has extensive experience in the content delivery network CDN market focusing on enterprise and service provider content delivery and application optimization needs Joel Christner CCIE No 15311 is the manager of technical marketing for the Cisco Application Delivery Business Unit ADU he has extensive experience with application protocols acceleration technologies LAN WAN infrastructure and storage networking Grevers and Christner are key contributors to the design and architecture of Cisco Application Delivery and Application Acceleration solutions provide high performance access to remote data content video rich media and applications understand how accelerators can improve network performance and minimize bandwidth consumption use NetFlow to baseline application requirements and network utilization ensure network resources are allocated based on business priorities identify performance barriers arising from networks protocols operating systems hardware file systems and applications employ application specific acceleration components to mitigate the negative impact of latency and bandwidth consumption integrate content delivery networks CDN to centrally manage the acquisition security and distribution of content to remote locations leverage WAN optimization technologies to improve application throughput mitigate the impact of latency and loss and minimize bandwidth consumption optimize the performance of WANs and business critical WAN applications this book is part of the Cisco Press Fundamentals series books in this series introduce networking professionals to new networking technologies covering network topologies sample deployment concepts protocols and management techniques category Cisco Press Networking covers network optimization

written by a Riverbed Solutions engineer this book gives an introduction to WAN optimization and how Riverbed's Steelhead appliances can be used to deliver superior application performance over the wide area network it provides an overview of

riverbed's steelhead product family and how they use specific techniques for delivering superior application performance across the WAN. It also provides practical hands-on instructions and troubleshooting tips for implementing Riverbed's Steelhead appliances. This book is intended for Cisco network administrators and IT professionals who are interested in understanding how WAN optimization and Riverbed solutions can dramatically improve the efficiency and productivity of their critical applications running over the wide area network. The 2018 edition includes coverage of WAN optimization for SaaS applications and the public cloud.

Implement advanced WAN optimization, application acceleration, and branch virtualization with Cisco WAAS 4.1. This book brings together all the information you need to design and deploy scalable, transparent application acceleration, WAN optimization, and branch virtualization solutions with dramatically improved wide-area application services. WAAS 4.1 products from Cisco, Cisco WAAS Insiders, Joel Christner, Zach Seils, and Nancy Jin systematically cover new WAAS software enhancements that enable far better performance, simplified workflow, and improved manageability. They introduce powerful new solution components including application-specific acceleration techniques, hardware form factors, and virtualization. They also thoroughly explain recent architectural improvements that provide a solid foundation for future WAAS solutions. The authors begin by reviewing the underlying technologies that comprise today's Cisco WAAS solution. Next, drawing on extensive personal experience, they walk through collecting requirements, designing effective solutions, integrating WAAS into existing networks, and configuring WAAS 4.1 software. This book is replete with real-world implementation examples and case studies, including extensive coverage of network branch office and data center integration. One step at a time, you'll learn how to deploy Cisco WAAS in a scalable, transparent, and seamless fashion, one that addresses both your business and technical challenges. Thoroughly understand WAAS 4.1's capabilities and learn how to use and manage it effectively. Understand both the Cisco WAAS appliance and router-integrated network module hardware family. Quickly deploy WAAS in lab or production pilot environments to quantify its potential benefits. Size, design, and deploy Cisco WAAS for maximum performance and value in your enterprise network. Compare and select design options for branch office and data center network integration. Deploy the WAAS Central Manager and Accelerator WAAS devices. Implement centralized authentication, authorization, alarm management, monitoring, and reporting. Configure WAN optimization with the Application Traffic Policy Manager. Configure, verify, and manage application acceleration. Leverage WAAS 4.1's powerful new branch office virtualization capabilities. Quickly troubleshoot WAAS problems using Cisco's own best practices. This book is part of the Networking Technology Series from Cisco Press, which offers networking professionals valuable information for constructing efficient networks, understanding new technologies, and building successful careers.
