Problems in Evaluation Design

1976

organized in three sections the first includes a historical perspective on the growth of evaluation theory and practice the second section includes articles on the major schools of thought about evaluation the final section describes and discusses the standards for program evaluation

An Evaluation of POLEX (CIFOR's Forest Policy Experts Listserv)

2005-01-01

helps educators to design assignments and rigorous rubrics that truly measure student learning objectives the ability of students to pass an examination does not necessarily reflect or guarantee their ability to apply knowledge in practice nor are traditional exams a sufficient means to evaluate all learning objectives written for both new and seasoned nurse educators this book is unique in its provision of rigorous rubrics that fully take into account learning objectives and the teaching-learning process and promote objective grading it examines a variety of time tested alternative evaluation methods discusses how to design them and includes best practices for using them the book provides an overview of how evaluation and rubrics play an integral part within the larger nursing education teaching-learning process it helps educators clearly define learning objectives and desired outcomes and how to evaluate them the book describes how to formulate a variety of teaching strategies design effective assignments and examine in detail specific evaluation methods including best practices for their use and exemplar analytic scoring rubrics also available are detailed modifiable grading rubric templates for each assignment presented evaluation methods covered include papers presentations participation discussion boards concept maps case studies reflective journals and portfolios the book will assist both new and seasoned nurse educators in their quest to graduate competent safe nurses at all levels of nursing education key features provides rigorous modifiable rubrics for learning objective grading includes time tested alternative evaluation methods describes best practices for designing a variety of teaching-learning evaluation tools includes guidelines for writing clear assignment descriptions discusses papers presentations concept maps case studies portfolios and more

Curriculum Evaluation Today

1976

using actual cases from educational health related and business settings the author shows readers how to do evaluation using a collaborative approach an approach which actually involves stakeholders in the evaluation process

Evaluation Models

2000-11-30

a guide written to assist newcomers to evaluations including program managers who may be involved in planning and managing evaluations it consolidates and updates advice in the evaluation papers series it covers the whole task of evaluation including designing evaluations and data collection and analysis

Foreign Affairs Research Papers Available

1970

a scientific publication system needs to provide two basic services access and evaluation the traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2-4 pre publication peer reviews and by keeping the reviews secret as a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper's quality is the prestige of the journal it appeared in open access is now widely accepted as desirable and is slowly beginning to become a reality however the second essential element evaluation has received less attention open evaluation an ongoing post publication process of transparent peer review and rating of papers promises to address the problems of the current system however it is unclear how exactly such a system should be designed the evaluation system steers the attention of the scientific community and thus the very course of science for better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions evaluation therefore is at the heart of the entire endeavor of science as the number of scientific publications explodes evaluation and selection will only gain importance a grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention so far scientists have left the design of the evaluation process to journals and publishing companies however the steering mechanism of science should be designed by scientists the cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships this research topic in frontiers in computational neuroscience collects visions for a future system of open evaluation because critical arguments about the current system abound these papers will focus on constructive ideas and comprehensive designs for open evaluation systems design decisions include should the reviews and ratings be entirely transparent or should some aspects be kept secret should other information such as paper downloads be included in the evaluation how can scientific objectivity be strengthened and political motivations weakened in the future system should the system include signed and authenticated reviews and ratings should the evaluation be an ongoing process such that promising papers are more deeply evaluated how can we bring science and statistics to the evaluation process e.g. should rating averages come with error bars how should the evaluative information about each paper e.g. peer ratings be combined to prioritize the literature should different individuals and organizations be able to define their own evaluation formulae e.g. weighting ratings according to

different criteria how can we efficiently transition toward the future system ideally the future system will derive its authority from a scientific literature on community based open evaluation we hope that these papers will provide a starting point

Evaluation Beyond Exams in Nursing Education

2014-07-29

value added tax vat is a mainstay of revenue systems in more than 160 countries because consumption is a more stable revenue base than other tax bases vat is less distorting and hence more likely to encourage investment savings optimum labor supply decisions and growth vat is not without criticism however and faces its own specific technical and policy challenges this book the first to thoroughly evaluate vat from a global policy perspective after over 50 years of experience with its intricacies offers authoritative perspectives on vat s full spectrum from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality the contributors leading tax practitioners and academics examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book including revenue generation and revenue efficiency single rate versus multiple rates susceptibility to fraud exemptions and exceptions compliance cost for businesses policy and compliance gaps in revenue collection adjustment rules caused by the transactional nature of the tax transfer pricing issues treatment of vouchers permanent establishments and holding companies payment of refunds cross border digital transactions and supplies for free or below cost price the second part offers six country reports on new zealand japan china colombia ethiopia and india to demonstrate the different ways in which vat operates in a variety of national economies whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions this invaluable book serves as an expert guide to vat policy development in this area it will be welcomed not only by concerned government officials but also by tax professionals both lawyers and accountants and academics in tax law

Practicing Evaluation

2004-02-04

this book offers a straightforward practical introduction to evaluation for beginners and practitioners it shows how to identify appropriate forms and approaches using an original framework the authors examine the role of evaluation in program development and offer techniques for involving stakeholders in the planning process and for disseminating the evaluation findings they use references to recent research and international examples

Doing Evaluations

1994

the concept of the triple bottom line has recently emerged to describe a new framework for development aimed at achieving economic and social balance while maintaining the long term integrity of ecological systems this requires measuring not only the economic viability of projects but also their impact on the environment and their contribution to society we live in a world where most people are aware of the importance of our environment the way in which this realisation came about has in hindsight not been as simple as could have been expected systematic evaluations of the economic viability of projects using discounting date back to the beginning of the last century and are something which has been readily accepted especially over the last few decades however an integrated approach including environmental and social aspects is much more recent and even now the methods and methodologies for such an approach are still being developed this volume details the state of the art of the development towards the triple bottom line it indicates where there is still debate about fundamental principles where theory has been overlooked in the name of convenience and where there are still unresolved problems the discussions provided here will serve to provide a more detailed understanding of what we do in our calculations what they mean and the limitations thereof

Beyond open access: visions for open evaluation of scientific papers by post-publication peer review

2021-08-09

this engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice featuring helpful checklists procedural steps provocative questions that invite readers to explore their own theoretical assumptions and practical exercises the book provides concrete guidance for conducting large and small scale evaluations numerous sample studies many with reflective commentary from the evaluators reveal the process through which an evaluator incorporates a paradigm into an actual research project the book shows how theory informs methodological choices the specifics of planning implementing and using evaluations it offers balanced coverage of quantitative qualitative and mixed methods approaches useful pedagogical features include examples of large and small scale evaluations from multiple disciplines beginning of chapter reflection questions that set the stage for the material covered extending your thinking questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects relevant links including pathways to more details about sampling data collection and analysis boxes offering a closer look at key evaluation concepts and additional studies checklists for readers to determine if they have followed recommended practice

Virtues and Fallacies of VAT: An Evaluation after 50 Years

1977

this volume examines how independent evaluation contributes to the legitimacy and effectiveness of the imf it describes the evolution and impact of the independent evaluation office ten years after its creation as well as the challenges it has faced it also incorporates feedback from a wide range of internal and external actors and offers useful insights for international organizations academics and other global stakeholders

Seminar Papers: Evaluation for Community Development Programme Projects (20 March 1991)

2012-07-18

all too frequently the largest effective barrier to interdisciplinary communication is jargon the symposium whose proceedings appear in the following pages sought of course to eliminate unnecessary and obscurantist jargon but it sought also to do something far more ambitious to confront the intellectual issues that are attached to the use of the word evaluation in medicine and health services to this end a carefully selected group of experts in medicine epidemiology and health economics was invited to present papers they were selected for their reputations either as conceptualizers or as empirical evaluators or the rarest breed of expert as both the context was to be empirical three procedures were selected that had been subject to evaluation but that posed rather different types of problem the first was the treatment of renal failure by dialysis of various kinds this has a relatively long history of evaluation with a large literature and particularly raises broad policy issues within the health services of western societies as to the size of programmes to be provided the type location and mix of treatments the selection of patients to receive treatment and the measurement of the success of various strategies the second was the treatment of duodenal ulcer by a new species of drug the histamine H₂ receptor antagonists specifically cimetidine

Research, Evaluation, Development Paper Series

2020-03-06

this volume examines the development and growing use of online student ratings and the potential impact online rating systems will have on the future of students evaluations of teaching the contributors demonstrate how the preference for online evaluation is growing even amidst challenges and doubt sharing their first hand experience as researchers and administrators of online systems they explore major concerns regarding online student ratings and suggest possible solutions d lynn sorensen and christian m reiner review existing online rating systems that have been developed independently across the globe kevin hoffman presents the results of a national survey that

tracks the increased use of the internet for student ratings of instruction at northwestern university nedra hardy demonstrates how ongoing research about online student evaluations is helping to dispel common misperceptions application of online rating systems can present institutions with new challenges and obligations trav d johnson details a case study based on five years of research in the response rates for one university s online evaluation system and suggests strategies to increase student participation reviewing online reporting of results of online student ratings donna c llewellyn explores the emerging issues of security logistics and confidentiality other chapters explore existing online systems highlighting their potential benefits for institution and instructor alike beatrice tucker sue jones lean straker and joan cole analyze course evaluation on the cew a comprehensive online system for instructional feedback and improvement cheryl davis bullock reviews the evaluation online eon system and its successful role in facilitating midcourse student feedback the fate of online rating may rest in the unique advantages it may or may not have over traditional ratings systems debbie e mcghee and nana lowell compare online and paper based methods through mean ratings inter rater reliabilities and factor structure of items comparing systems from another angle timothy w bothell and tom henderson examine the fiscal costs and benefits of implementing an online evaluation system over paper based systems finally christina ballantyne considers the prominent issues and thought provoking ideas for the future of online student ratings raised in this volume together the contributors bring insight and understanding to the processes involved in researching and initiating innovations in online rating systems this is the 96th issues of the quarterly journal new directions for teaching and learning

Program Evaluation

1978

what methodological tools have been most useful in doing evaluation what are some of the new methodologies that are being used and developed will the types of things evaluated expand from programs personnel and products to foreign aid medical technology environmental interventions and world bank loan programs what will evaluation be like in the 21st century these impressive evaluators from around the globe explore how evaluation has come to be what it is today and what the professional evaluation landscape will be like in the future they examine the following what makes evaluation different from other disciplines the links and differences between evaluation and auditing professions which activities have priority in evaluation under what circumstances and for what purposes new methodological approaches to doing evaluation the issues of advocacy versus truth in evaluation and between evaluating programs versus empowering people to evaluate their own programs evaluation for the 21st century features thoughtfully written introductions to each of the main sections that provide a context and synthesis of the various evaluators chapters after reading this groundbreaking book researchers and practitioners will be able to recognize these new developments in evaluation as they encounter them place them in context and incorporate them into their own evaluation professions and practices a stunning achievement evaluation for the 21st century is for all professionals and practitioners in evaluation management public administration sociology psychology education research public health and nursing

A 'Triple Bottom Line' Approach to Advanced Project Evaluation

2012-03-01

this paper analyzes that the imf has moved beyond its traditional fiscal centric approach to recognize that social protection can also be macro critical for broader reasons including social and political stability concerns evaluating the imf s involvement in social protection is complicated by the fact that there is no standard definition of social protection or of broader overlapping terms such as social spending and social safeguards in or outside the imf in this evaluation social protection is understood to include policies that provide benefits to vulnerable individuals or households this evaluation found widespread imf involvement in social protection across countries although the extent of engagement varied in some cases engagement was relatively deep spanning different activities bilateral surveillance technical assistance and or programs and involving detailed analysis of distributional impacts discussion of policy options active advocacy of social protection and integration of social protection measures in program design and or conditionality this cross country variation to some degree reflected an appropriate response to country specific factors in particular an assessment of whether social protection policy was macrocritical and the availability of expertise from development partners or in the country itself

Vehicle Classification Sampling Methodology Evaluation

1983

the evaluation of labour market and other public policies has become increasingly important in recent years in an era of tight government budgets a thorough analysis of these measures is imperative this book provides a comprehensive overview and assessment of the most relevant microeconomic evaluation methods it focuses on the popular propensity score matching method and gives extensive guidance for its implementation in the second part of the book this method is used to evaluate the employment effects of job creation schemes on the participating individuals in germany based on a large administrative dataset of over 11 000 participants the study allows to draw policy relevant conclusions for the first time

Program Evaluation Theory and Practice, First Edition

1969

critics of qualitative educational evaluation frequently assume this approach is a monolithic entity rather than a multitude of varied approaches this collection dispels this myth by comparing contrasting and clarifying various qualitative approaches it represents a wealth of practical alternatives designed to add to the evaluator s arsenal the editor has combined classic papers with newer writings to present a comprehensive coverage of varied approaches in the field including ethnography naturalistic inquiry generic pragmatic sociological qualitative

inquiry connoisseurship and criticism and a few completely new qualitative approaches which are presented in this work by their founders or major proponents

Compendium of HHS Evaluation Studies

2012-12-24

since application of integrated energy systems iess has formed a markedly increasing trend recently selecting an appropriate integrated energy system construction scheme becomes essential to the energy supplier this paper aims to develop a multi criteria decision making model for the evaluation and selection of an ies construction scheme equipped with smart energy management and control platform

Comments on Professor Wiley's Paper Entitled "Design and Analysis of Evaluation Studies"

2012-12-06

evaluation research can assess the value and effectiveness of interventions and innovations involving people while this has often been on a grand scale this book focuses on small scale projects carried out by an individual or small group typically lasting for weeks or at most a few months at a local rather than national level using limited jargon and featuring integrated real world examples this second edition offers a clear accessible background to evaluation and prepares you to undertake your own small scale evaluation research project key features include discussion of different approaches to evaluation and how to choose between them the advantages and disadvantages of randomized controlled trials rcts realist evaluation and its increasing importance the centrality of ethical and political issues the influence and opportunity of the internet tightly focused on the realities of carrying out small scale evaluation small scale evaluation is a highly practical guide covering the needs of both social scientists and others without this background colin robson is an emeritus professor in the school of human health sciences at the university of huddersfield

Independent Evaluation at the IMF

1969

the book s chapters provide background on how and why the cipp context input process product model was developed a detailed presentation of the model an explanation of the key role of an evaluation oriented leader who can decide what and when to evaluate detailed presentations on evaluation design budgeting and contracting procedures and tools for collecting analyzing and reporting evaluation information and procedures for conducting standards based meta evaluations evaluations of evaluations these topics are interspersed with illustrative evaluation cases in

such areas as education housing and military personnel evaluation

Economic and Medical Evaluation of Health Care Technologies

2011-09-28

changes in the initial stages of the evaluation process over the last decade are reflected in how to focus an evaluation a new book in the series this volume replaces the first edition s how to deal with goals and objectives the volume recognizes that deciding what to evaluate is a complex negotiation process that involves the methodological predisposition of the evaluator and the client client needs the nature of the program and the constraints surrounding the evaluation it outlines five models that characterize different methodological approaches and considers how each may contribute to the focusing process the text provides advice on how and what type of information to collect from clients how to clarify and prioritize evaluation concerns and how to formulate a plan matching evaluation concerns with data collection procedures within cost constraints

Comments on Professor Wiley's Paper Entitled "Design and Analysis of Evaluation Studies"

1999

this report looks at small scale aquaculture from the viewpoint of poverty reduction what are the main factors that enable fish farming to generate livelihoods and reduce poverty based on case studies the first part of the report highlights the importance of access to capital assets human social natural physical and financial and to a range of transforming processes such as markets institutions facilities infrastructure and services
