I Want to Change My Life

2010

a leading expert in addiction and mood disorders shares a five point plan for overcoming anxiety depression and addiction he describes the symptoms causes treatment and relapse prevention strategies and includes numerous exercises and a one month step by step program

My Name Is Steven and I Am an Alcoholic

2004-07

steven berez was born in los angeles california in 1955 when steven reached 14 years of age he began to participate in the 1960s glamour of drugs and alcohol this continued until he was brought to his knees by the disease of addiction at the age of 28 steven checked into a drug rehab program and began his one day at a time lifelong battle with addiction this book is a rare deep insight into the thought process of those who suffer from addiction

The Heroin Stimulus

2012-12-06

the simple fact that the authors were able to give injectable heroin to volunteers for addictive self administration at a harvard facility may elude the notice it deserves on the other hand resec irch questions center ing on whether heroin is linked to a craving for pleasure or relief of pain might raise the transplanted hackles of those who simplistically see scien tists as pursuing only transparent trivialities in truth this report is about a historical and pioneering step in clinical research on a major unsolved problem of the biological social psychological roots of addiction the research questions posed are clearly relevant both to the design of effec tive treatments and treatment policy and to the basic science search that could help our understanding of how

addictive drugs capture such powerful control over behavior heroin was synthesized and has been available along with aspirin for over three quarters of a century yet with all the tools of western science and with the enormous and growing social personal and economic costs of world wide heroin use we surprisingly

Methamphetamine Addiction

2009-05-04

separating myth from fact this authoritative work reviews the breadth of current knowledge about methamphetamine addiction and describes the most promising available treatment approaches leading experts present state of the art information on the effects of methamphetamine on the brain body mental health and behavior psychosocial and pharmacological treatment strategies are critically evaluated including approaches to treating dually diagnosed clients written in a concise accessible style the volume emphasizes that recovery is possible despite the significant challenges the drug poses the authors identify key avenues for collaboration among clinical public health and other professionals

Heroin Stimulus

1979-01-01

for the first time a doctor has developed a treatment program especially for hidden addicts people whose lives look just fine on the surface but who are secretly driven by stress into addictive destructive behaviors until now many of these people have been alone in their struggle their addictions undetected by friends colleagues even sometimes family now this breakthrough program treats both hidden substance abuse problems and their underlying causes without unnecessarily stigmatizing these otherwise highly functioning people richard gracer md is the founder and director of gracer medical group which has been holistically treating patients with complex health issues since 1979 in 2005 he launched gracer behavioral health services specifically to treat addiction alcoholism and other stress related mental health issues he has pioneered a revolutionary 5 step treatment protocol that addresses substance abuse cravings and their underlying causes through intensive short term treatment across several disciplines it uses several new drugs some very recently approved by the fda that promise to revolutionize the treatment of addictions as well as a comprehensive support system to address the many challenges addicts face

A New Prescription for Addiction

2007

don't forget me encourages and guides parents with the tragic but compelling story of a family destroyed by addiction and substance abuse

Don't Forget Me

2020-02-04

what if jesus did not come to die for our sins what if instead jesus's life and death was intended to provide a way out of our shame while traditional christian teachings about the atonement emphasize sin as guilt and transgression against god's will and commandments frank woggon points out that clinical spiritual care reveals that the human condition is predominantly marked by shame rather than guilt in the empathic god woggon examines myopic readings of the jesus event that in turn have embedded distortions into traditional paradigms of the atonement in contrast woggon mines narratives of the human condition to engage in a critical examination of the jesus story as a clinician and ordained baptist minister woggon presents the jesus event as god's empathic initiative toward humanity and convincingly argues that salvation comes through empathy rather than forgiveness woggon's work constructs a clinical theology of atonement from the perspective of clinical spiritual care the empathic god calls for a practical response of caring participation in god's ongoing work of salvation through an empathic praxis of spiritual care most importantly the empathic god takes seriously that lived human experience is the starting point for theological exploration rather than doctrine this book will help practitioners and students of spiritual care in the christian tradition to reflect more critically on the intersection of spiritual care practice and theology the book also will challenge pastors ministers of pastoral care chaplains pastoral counselors spiritually oriented therapists to interrogate and re-interpret traumatic shame-filled christian teachings about the atonement so that they too can join in god's ongoing and liberating work of salvation

Choosing Simplicity

2010-12

this brief takes the reader on a chemical journey by following the history for over two centuries of how an opiate became an opioid thus spawning an empire and a series of crises these imperfect resemblances of alkaloids are both natural and synthetic substances that particularly in america

are continually part of a growing concern about overuse this seemed an inviting prospect for those in pain but as the ubiquitous media coverage continues to lay bare the levels of abuse point to the fact that perhaps an epidemic is upon us if not a culture war seeking answers to how and why this addiction crisis transpired over two hundred years of long development this brief examines the role that the chemistry laboratory played in turning patients into consumers by utilizing a host of diverse sources this brief seeks to trace the design and the production of opioids and their antecedents over the past two centuries from the isolation and development of the first alkaloids with morphine that relieved pain within the home and on the battlefield to the widespread use of nostrums and the addiction crisis that ensued to the dissemination of drugs by what became known as big pharma after the world wars and finally to competition from home made pharmaceuticals the progenitor was always in some form a type of chemistry lab at times the laboratory pressed science to think deeply about society's maladies such as curing disease and alleviating pain in order to look for new opportunities in the name of progress despite the best intentions opioids have created a paradox of pain as they were manipulated by creating relief with synthetic precision and influencing a dystopian vision thus influence came in many forms from governments from the medical community and from the entrepreneurial aspirations of the general populace for better but mostly for worse all played a role in changing forever the trajectory of what started with the isolation of a compound in germany combining chemistry and history in a rousing new long form narrative that even broadens the definition of a laboratory the origins and future of this complicated topic are carefully examined

The Empathic God

2024-05-07

provocative insightful and instructive analysis of the cinematic and philosophical significance of steven soderbergh's work jason holt editor of the daily show and philosophy moments of zen in the art of fake news widely regarded as a turning point in american independent cinema steven soderbergh's sex lies and videotape launched the career of its twenty six year old director whose debut film was nominated for an academy award and went on to win the cannes film festival's top award the palme d'or the philosophy of steven soderbergh breaks new ground by investigating salient philosophical themes through the unique story lines and innovative approaches to filmmaking that distinguish this celebrated artist editors r barton palmer and steven m sanders have brought together leading scholars in philosophy and film studies for the first systematic analysis of soderbergh's entire body of work offering the first in depth exploration of the philosophical ideas that form the basis of the work of one of the most commercially

successful and consistently inventive filmmakers of our time

A Time-Release History of the Opioid Epidemic

2018-06-20

countless people sit in church each sunday and suffer silently they feel depressed or anxious or disillusioned with their lives but are afraid to admit it for fear they will be seen as having weak faith after all if i love and trust god i shouldn t feel like this god s psychology integrates biblical truth and psychological insights to clear away the obstacles that keep us stuck in feeling thinking and behaving in destructive ways we are destined to repeat the same mistakes over and over again by our negative emotions unloving attitudes and impulsive behaviors because we fail to examine our heart soul and mind and overcome the deception in our lives with god s word as your anchor and sound mental health principles as your guide god s psychology will walk you through the process of both self examination and god examination to uncover your negative emotions and thoughts while transforming the way you see your life you ll learn about the common traps that lead you in self deception and how to replace your faulty emotions and thoughts with god s truth about you god s psychology gives you the hands on tools to challenge your self deception change the way to feel and think and live life authentically enabling you to love god with all your heart your soul and your mind terry l higgins has a ph d in psychology and holds a master s degree in business administration dr higgins has worked in the mental health profession for the past twenty five years providing psychotherapy to adults couples and children helping them overcome a wide range of mental emotional and behavioral problems she currently has a private practice in long beach california and has been a public speaker on numerous subjects over the years including communication and listening skills training

Medical Research in the Veterans' Administration

1973

our understanding of the neurobiological basis of psychiatric disease has accelerated in the past five years the fourth edition of neurobiology of mental illness has been completely revamped given these advances and discoveries on the neurobiologic foundations of psychiatry like its predecessors the book begins with an overview of the basic science the emerging technologies in section 2 have been extensively redone to match the progress in the field including new chapters on the applications of stem cells optogenetics and image guided stimulation to our understanding and treatment of psychiatric disorders sections 3 through 8 pertain to the major

psychiatric syndromes the psychoses mood disorders anxiety disorders substance use disorders dementias and disorders of childhood onset each of these sections includes our knowledge of their etiology pathophysiology and treatment the final section discusses special topic areas including the neurobiology of sleep resilience social attachment aggression personality disorders and eating disorders in all there are 32 new chapters in this volume including unique insights on dsm 5 the research domain criteria rdoc from nimh and a perspective on the continuing challenges of diagnosis given what we know of the brain and the mechanisms pertaining to mental illness this book provides information from numerous levels of analysis including molecular biology and genetics cellular physiology neuroanatomy neuropharmacology epidemiology and behavior in doing so it translates information from the basic laboratory to the clinical laboratory and finally to clinical treatment no other book distills the basic science and underpinnings of mental disorders and explains the clinical significance to the scope and breadth of this classic text the result is an excellent and cutting edge resource for psychiatric residents psychiatric researchers and doctoral students in neurochemistry and the neurosciences

Medical Research in the Veterans' Administration

1974

over the past forty years the criminal justice system in the united states has engaged in a very expensive policy failure attempting to punish its way to public safety with dismal results so called tough on crime policies have not only failed to effectively reduce crime recidivism and victimization but also created an incredibly inefficient system that routinely fails the public taxpayers crime victims criminal offenders their families and their communities strategies that focus on behavior change are much more productive and cost effective for reducing crime than punishment and in this book william r kelly discusses the policy process and funding innovations and priorities that the united states needs to effectively reduce crime recidivism victimization and cost he recommends proactive evidence based interventions to address criminogenic behavior collaborative decision making from a variety of professions and disciplines and a focus on innovative alternatives to incarceration such as problem solving courts and probation students professionals and policy makers alike will find in this comprehensive text a bracing discussion of how our criminal justice system became broken and the best strategies by which to fix it

The International Journal of the Addictions

1995

renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles each volume also includes a complete list of the periodicals consulted

The Philosophy of Steven Soderbergh

2011-01-28

James Craig M.D. had a thriving medical practice a loving family and a house becoming of his profession and with all of this it was not meant to last at least not without change a closer look revealed a body of lies and deceptions so engrained that he had nowhere to look but up as federal agents finally confronted Dr. Craig about false patients receiving controlled narcotics Dr. Craig leads readers through the tumultuous upbringing that set a pattern for addiction and then finally through the knowledge and understanding he discovered that broke the chains of his past James shows readers how to overcome the past and how to be rid of projections for the future that needlessly destroy them today by revealing overlooked workings of the human psyche he shows you how to live in the present for James Craig it was being a drug addict but the lessons he has learned will help anyone struggling with addiction Dr. Craig dares everyone to try the changes outlined in this book there is nothing to lose but some hopelessness misery and pain James C. Craig M.D. is a physician in private practice in Ellijay Georgia where he lives with his wife Leslie and son Anderson he received his undergraduate training at Emory University and medical school training at the Medical College of Georgia

God's Psychology

2011-11

at a time when both scholars and the public demand explanations and answers to key economic problems that conventional approaches have failed to resolve this groundbreaking handbook of original works by leading behavioral economists offers the first comprehensive articulation of behavioral economics theory borrowing from the findings of psychologists sociologists political scientists legal scholars and biologists among others behavioral economists find that intelligent individuals often tend not to behave as effectively or efficiently in their economic decisions as long held by conventional wisdom the manner in which individuals actually do behave critically depends on psychological institutional cultural and even biological considerations handbook of

contemporary behavioral economics includes coverage of such critical areas as the economic agent context and modeling decision making experiments and implications labor issues household and family issues life and death taxation ethical investment and tipping and behavioral law and macroeconomics each contribution includes an extensive bibliography

2012-01-01

conventional wisdom dictates that those goods which are said to cause harm or impose costs on society deserve a special tax for centuries governments have levied these sin taxes on alcohol and tobacco but the list of taxable sins has now grown to include soda and marijuana with calls to impose further taxes on plastic bags meat and even robots and carbon contrary to what experts and policymakers tell us many of these alleged sins impose very little if any cost on society and the harms that do exist can be minimized without resorting to tax what follows in this book is a discussion of four case studies on tobacco marijuana alcohol and soda which make the case against the conventional wisdom in taxing these sins before concluding that when it comes to taxing sin it is time for governments to forgive and forget
